The Municipal Census Program

The Municipal Census Program is coordinated by the Town of Raymond. The Town is responsible for hiring census takers, overseeing the enumeration and for tabulating, analyzing and publishing the results. In addition to providing valuable information for the Town, the program also helps various provincial government departments and local authorities and agencies plan the services they provide to the residents of Raymond. Please contact Legislative Services at (403)752-3322 for any additional information you may need.

Notice to Users

This document presents a summary of the municipal census data using standard tables and includes information from the 2017 census conducted between April 10 and May 31, 2017.

Method of Gathering Information

The 2017 Census went online in Raymond for the first time. Census takers delivered door hangers with Personal Identification Numbers (PIN) unique to each address, and residents were invited to complete the census online. In total, 53% of our addresses were completed online.

After the initial two-week online response period, four (4) enumerators worked diligently to complete the gathering of information from residents who did not complete online. Enumerating was complete on June 30, 2017 (as mandated by the provincial government).

Legislative Services is very pleased with the results of the methods used to compile the following data and are happy to present the following information.

Data Discrepancy

This year the census was transitioned to an online reporting system. Data discrepancy seen this year is in part due to this change in methodology. This will be the new methodology used going forward and 2017 numbers will be established as the new benchmark.
