

2023 FEES & CHARGES ANALYSIS

Abstract

This report has been developed to provide Council with background information to assist them in setting the user fees and charges for various municipal services during the 2023 operating year.

Clark Holt
Financial Services Manager

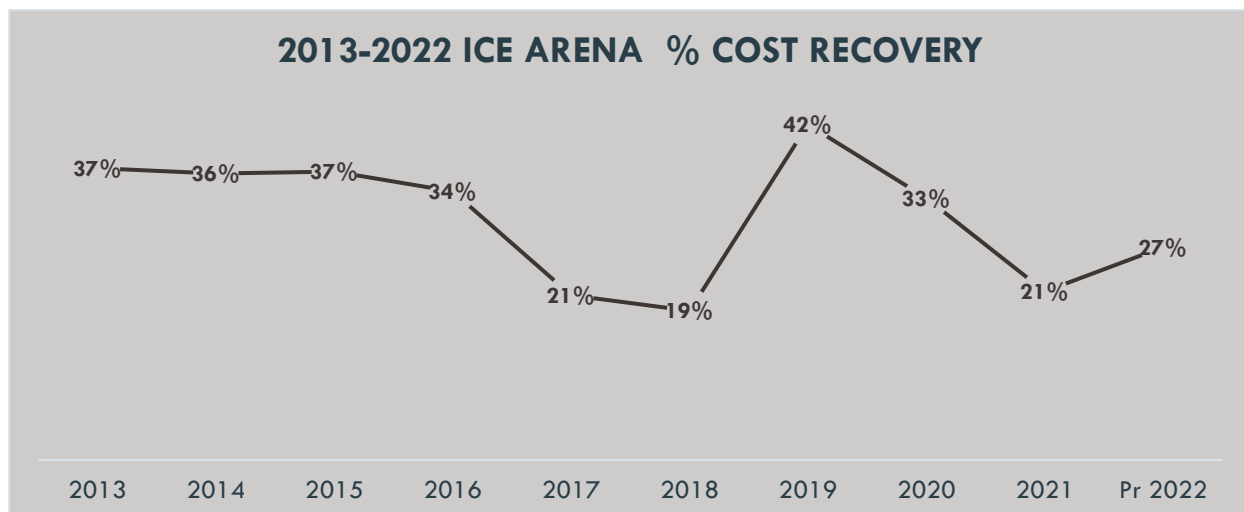

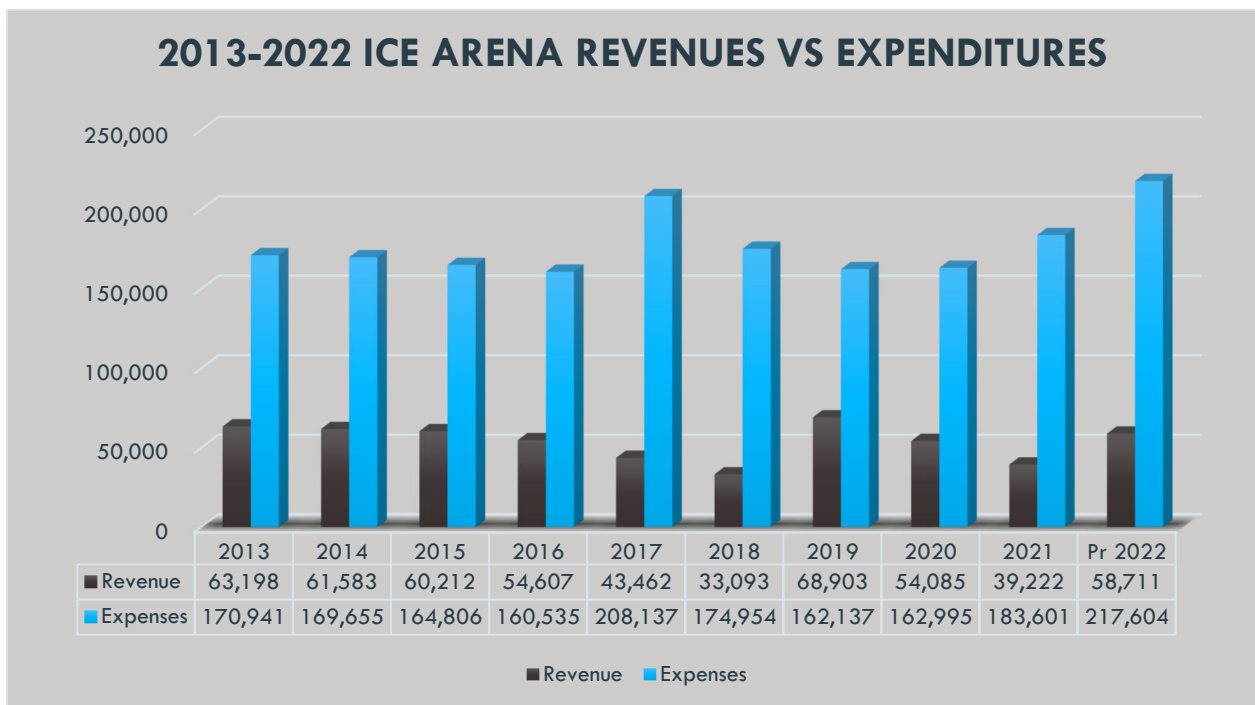

Executive Summary

Council annually reviews the fees and charges that are assessed by the Town for the services that it provides. This document is meant to provide Council with information to properly determine if the right rate is being assessed. Administration has compiled the actual and projected (PRJ) revenues and expenditures from the current and future year. The Directors from each department provided their recommendations on proposed rate changes based upon their review of the business case for each category and taking into consideration market realities of our region. If there are no graph data present, it is due to the difficulty in accurately determining true costs expensed in the provision of that service. Council is free to make any changes they feel are necessary to balance these recommendations with their desired services levels or the potential political implications of a decision.
